- Create Cleanse Functions in MDM based on IDQ Web services.
- Actively interact with the Onshore and Business SMEs to ensure the clarity of the requirements and quality of the deliverables.

Project #3

Xyz

Client Xyz
 Project Type Provide Proof of Concept on Identification of Correlarion between sales data attributes, and Treatment Pathways.
 Tools Hive, Impala, Oracle 11g, Visio, UNIX, & SVN.
 Team Size 5
 Role Architect & Technical Manager
 Period #####
 Organization #####

Project Objective

Build solution based on Saama's Fluid Analytics Engine for Client specific pain areas that could later be industrialized into a full project.

Project Description

Correlation Identification - Identify correlation between various sales data attributes across the globe from its sales numbers. This input would then get used for the Analytics program to figure in best Algorithms for sale forecasting.

Role and Responsibilities

- Define the solution Architecture and data architecture for the projects.
- Estimate the design and development effort and present solutions.
- Technical guidance and architectural support to the team.
- Actively interact with the client and Business teams for requirements and ensure the clarity of the requirement.

Project #4

Client Xyz
 Project Type BI Reporting of Secondary Sales for their
 Indian Sales from distributors.
 Tools Informatica Power Center, Oracle 11g, Visio, UNIX, & SVN.
 Team Size 6
 Role Architect & Technical Manager
 Period Xyz
 Organization Xyz

Project Objective

Build an end to end reporting solution to capture secondary sales made by the distributors and Onwards sales made there on by the medical or pharma stores.

Project Description

Build strategic BI reporting solutions systems for efficient capture of secondary sales.

Role and Responsibilities

- Refine the existing Data Integration architecture.
- Create the Architecture and framework for the proposed new solutions.
- Estimate the design and development effort and demo the proposed solutions.
- Technical guidance and architectural support to the existing Project teams in Pune center.
- Actively interact with the client and Business teams to ensure the clarity of the requirement.
- Visit the Client site to meet Leads/ Directors for Project Status and present the application and its progress.

Project #5

Client Xyz
 Project Type Duck Creek based Policy Writing Underwriting, Data
 warehousing, BI and Big Data Projects.
 Tools Ab Initio, Autosys, Oracle 11g, Visio, Teradata, SQL
 Server, DB2, UNIX, & SVN.
 Team Size NA
 Role Senior DW Architect
 Period #####
 Organization Xyz
