

EXPERIENCE SUMMARY

- About 5 years of experience in Analysis, Design and development of software solutions.
- About 4.6+ years of experience on **TIBCO,UI/UX, Java & Camel Framework**, this includes experience in analysis, design, development, deployment and administration in **EAI/SOA/BPM/ESB tools**.
- About 3 years of Experience in Product development.
- Expertise in TIBCO & Camel Framework i.e. **TIBCO GI, TIBCO AMX Business Works ,TIBCO iProcess Suit, TIBCO Administrator, TIBCO EMS ,Red Hat JBOSS FUSE ESB,SAG, Web Methods**
- Areas of experience include Project Management / Coordination, Architecture consulting, Designing, Coding and implementation.
- Extensive experience in using Enterprise Application Integration tools from TIBCO for architecting EAI (Single Server (Standalone Server), Admin Server with Clustered Managed Server) solutions, Analysis, Design, Development, Testing, Review, Deployment and Production of TIBCO based Enterprise, Designed Tibco middleware solution to integrate.
- Participated in consulting engagements to do integration study, Roadmap definition, COE setup and propose EAI solution for the requirement and RFP.
- Involved in creation of Proof of Concepts (POC) and template implementations for TIBCO tools to speed up their implementations in required projects
- Having Good Experience in Web portal development and Design
- Working experience on configuration of Adapters & Plugins like: ADB Adapter, File Adapter, Rest JSON, SOAP Web Service, EDI, Large Excel etc.
- Participate in defining the technical architecture and coding standards
- Perform structured application code reviews and walkthroughs as needed
- Experience in coordination and completion of medium and big sized projects - Overseeing all aspects of projects, meeting deadlines, distributing responsibilities, monitoring and summarizing the progress
- Having Good Experience in BFSI, Retail, Supply Chain Management, E-Commerce and Telecom domain.
- I have Completed Certification for banking domain as industry Level.
- Help the team to understand the technical details of the system with regards to different terminology

- Co-coordinating onsite / offshore activities for analysis, design, development and support activities
- Quick learning aptitude, excellent communication skills and organizational skills, Focus on quality & drive for excellence.

PROJECT 1

- Organization : XYZ
- Client : **XYZ**
- Operating Systems : Windows Server 2012 R2
- Tools : TIBCO Spotfire 7.6
- Duration : Apr 2016 to #####
- Role : TIBCO Spotfire Admin

PROJECT DESCRIPTION

- Responsibility includes administration of Tibco Spotfire Platform, Handle tickets assigned in the form of work orders and incidents in Remedy on Demand.

RESPONSIBILITIES

- Creating Folders, Groups and granting access to the users.
- Migration of Applications/Folders/Files between environments (Ex: Development to TEST or TEST to Production)
- Creating Automation jobs and Schedule updates for the required applications.
- Deployment of hot fixes for every quarter.
- Monitoring Logs (Analyzed the Action logs to find what the users are doing, when they login and what work they do)
- Synchronizing the AD groups with Spotfire
- Monitoring Spotfire database table size on every month.

PROJECT 2:

- Project Name : XYZ
- Client : XYZ
- Duration : Dec2012 to #
- Team size : 12

PROJECT DESCRIPTION:

XYZ provides services with CDMA and GSM technologies. Under these technologies, XYZ is offering SMS, Voice and data services. TIBCO team supports in all the data related information from different databases.

XYZ and Oracle CRM are the versatile tools where the manual SRs can be analyzed routed and closed. The other supporting tools are PPS INDRs, PBO Telcordia GUI, PBO prepaid configurations GUI, PBO EVD configurations GUI, VIRGIL (VMI CDMA & VMI GSM).

Prepaid- TIBCO is a team that supports prepaid for fixed and mobile services. The team handles all activations, disconnections and sharing the information to different databases.

In this project, TIBCO Active Enterprise product was chosen as the EAI solution to integrate the following applications.

- Prepaid –TIBCO (Provisioning)
- Customer Relationship Management (Oracle Applications)
- TIBCO is used as an EAI tool to integrate various modules.

Oracle CRM serves as the Customer Relation Management application. It is integrated with IN (Intelligent Network).

Service Requests: Oracle CRM are the versatile tools where the SRs can be analyzed, routed and closed. Detailed validation of the SR and updating benefits to the MDN (if required) can be done.

EVD postings: It is the process existing with the client. EVD reversal is the process of recharge benefits from the customer (if the customer had the same) and updating the same to the retailer based on the request from retailer of the client.

RESPONSIBILITIES

- Creating, modifying and debugging TIBCO BW engines and monitoring the same in ADMIN Deployments of engines.
- Implemented Fault Tolerance for Business Works Engines and EMS in Production Environment.
- Implementation of Distributed Queue for Load Balancing the Business Works Processes and EMS in Production Environment.
- User Management in Admin i.e. adding of users from the file or database and provides the required permissions to the users added under the admin.
- Debugging the functional/technical issues through components logs in UNIX console by using commands (tail, grep etc.).
- Designed the Statistical flows based on Information Links.
- Discussed with Clients and developed the current status of the Business reports.
- Monitoring the Admin and HAWK in console after hawk and admin get started.
- Developing TIBCO codes to implement business logics using TIBCO BW.
- Developing the interfaces and supported for them in SIT and UAT and even had done Production roll outs for more than 150 Interfaces.
- Deployment of EAR's/configuration details using shell scripts which uses internally app manage commands.
- Designed BW interfaces to automate the Process of clearing the orders after downtime and issues.
- Building knowledge base for the team and sharing knowledge with team members.
- Supported the project and fixed the issues.

- Developed the interfaces and supported for them in SIT and UAT and even had done Production roll outs for more than 150 Interfaces.
- Participating in discussions for to implement new business requirements or any changes to existing business functionality.
- Ability to load into Spotfire from Excel and Various Data Sources.
- Create Dashboards, reports, analytics and advanced data visualizations utilizing TIBCO Spotfire toolset.
- Creating and Using Information Links
- Regular Health Checks of all the Tibco Applications.
- Resolving the Defects/Issues Raised by Business/Different Teams.
- Maintaining the Logs to debug the issues.
- Resolving the Tickets.
- Restarting the Applications/Admin/EMS after DownTimes and Patching the Servers.

PROJECT 3:

- Organization : XYZ
- Client : XYZ
- Operating Systems : Windows Server 2003, Windows Server 2012
- Tools : Admin Studio, VBScript, Robocopy, MS Deploy tool
- Duration : August 2015 to #####
- Role : Application Migration, Infra Migration and Web Migration

PROJECT DESCRIPTION

Checking the roles, features, Files, printers, Web applications installed in 2003 source server, and migrate them to target server. Copying the data of Source server to target server using Robocopy tool. Checking the application behavior in 2003 source server, Creating the backup file of Web Applications to deploy that in target server using Microsoft Web deploy tool. Deploying the backup file in target operating systems and make sure that the behavior is same like source server.

RESPONSIBILITIES

- Performing T-Minus activities on the source server to validate the prerequisites of the server before migration.
- Working experience in using Robocopy tool to migrate files from source server to target server during migration.
- Prepared required checklists to capture all the features, roles and applications installed on the source server and use the same during installing the same on the target server.
- Migrate Installed applications, Printers, shares and folder permissions from source server to target server as scope of migration.
- Install IIS Web Server Role in Windows Server 2003 and Windows Server 2012.

DECLARATION

I hereby declare that the information furnished above is true to the best of my knowledge and belief.

Thanking you,
