S U M M A R Y

- 5 years of IT Experience in development of Business applications in the field of Data warehousing.
- 2 Years of Experience in developing interactive analytics using Tibco Spotfire(7.10\7.6\6.5\4.5\3.2.1)
- 1 Year of Experience in developing interactive applications using Qlikview(11)
- Worked on Agile Methodology.
- Underwent Corporate Training in Tibco Spotfire Analytical tool.
- Expertise in Tibco Spotfire Development and Administration.
- Worked on Converting Requested BO Reports into Tibco Spotfire Analytics.
- Involved in all phases of development like requirements gathering and analysis, preparing functional specification documents, Technical Documents and Trouble shooting and Bug Fixing of Analytics.
- Developed Information Links and developed analytics using all the available visualizations i.e. Bar Charts, Pie Charts, Line Charts, Scatter Plots, Cross tabs and Combination Chart.
- Worked on Library Administration and Administration Manager in Tibco Spotfire.
- Worked with the XYZ in request for support and new Enhancements.
- Involved in Requirement gathering & designing QlikView Applications.
- Worked on creating QVD files and debugging data model in Qlikview.
- Designing Data Modeling and Loading data from Multiple Datasources.
- Publishing and Deploying the Dashboards based on business requirements.
- Hands-On development experience with Business Objects XIR3.1 WebI, Universe Design, Reporting.

- Experience in Unit testing, System Integration testing and User acceptance testing.
- Involved in creating testing documents.
- Having Good exposure to Software Development Life Cycle (SDLC).
- Ability to handle Multiple Tasks and work independently as well as in a team.

TECHNICAL SKILLS

- **Tools**
 - TIBCO Spotfire Professional Client 7.6
 - TIBCO Spotfire Web Player 7.6
 - TIBCO Spotfire Automation Services 7.6
 - TIBCO Spotfire Server 7.0
 - TIBCO Spotfire Professional Client 7.0
 - TIBCO Spotfire Web Player 7.0
 - TIBCO Spotfire Automation Services 7.0
 - TIBCO Spotfire Server 7.0
- **Database** Oracle 10g, SQL Server
- **Language** Iron Python, SQL, PL/SQL

PROJECT ACCOMPLISHMENTS

Project #1

Title: XYZ

Client: XYZ

Brief Description:

The American College of Surgeons is a scientific and educational association of surgeons used to improve the quality of care for the surgical patient by setting high standards for surgical education and practice.

In an effort to provide surgeons with the best scientific evidence available through evidence-based data, ACS works to improve the quality of surgical care through the ACS National Surgical Quality Improvement Program, National Cancer Data Base, National Trauma Data Bank, and Trauma Quality Improvement Program.

Responsibilities:

- Worked with BA and DBA's on gathering requirement as a process of Agile Development Model.
- Created Views, Functions, Indexes, and Synonyms as part of Performance Tuning.
- Created Information Links in loading data to the Spotfire.
- Used On-Demand function to filter out data using Document Properties.
- Worked on TERR Functions in creating Output Parameters and passing them as values to Document Properties.
- Created Interactive Visualization using Iron Python Scripts for Document Properties and Action Controls.
- Developed Spotfire Analytics using different visualizations and using various in built Functions.
- Created Configuration Blocks and used in the front end application.
- Worked on Scheduling Analytics, giving access to users, Migrating of Folders as an Admin role.
- Worked with onsite support team related to defects occurred by the Spotfire Versions.
- Worked on Unit Testing.

Environment:

- Tibco Spotfire 7.10\7.7
- Talend
- Oracle
- Windows 2010

Project #2

Title: XYZ

Client: XYZ

Brief Description:

Worked in COE Team that Developed Multiple Report for different GE Healthcare Client across the Globe.

Roles and Responsibilities:

- Consumed data into Spotfire using Information Link.
- Used **Property Controls** to provide options to select date and values.
- Created **Line chart** to show the trends of Contract Profitability on yearly basis.
- Created **Bar chart** to show Contract Profitability.
- Involved in **Spotfire Server installation & configuration** activities
- Created several **Cross Table** to show the data selected across different Region.
- Created **Scatter plot** to show Profitability across various region.
- Created different filtering Schemes for different pages.
- Implemented different coloring schemes.
- Written different Iron Python Scripts to display the latest Run Date in Property control Dropdown

Project #3

Title: XYZ

Client: XYZ

Brief Description:

Its primary businesses are retail banking, direct banking, commercial banking, investment banking, asset management, and insurance services. Consumer resource and Credit cards is using TIBCO tool for middleware. It integrates the Credit line of business with other application.

The TIBCO environment will cater for Inbound/Outbound execution & transaction, security flows between Credit Systems and with partners, lookups to legacy systems.

Roles and Responsibilities:

- Perform analysis on TIBCO trace data, coordinate with team and debug technical issues.
- Performance analysis and fine tuning of TIBCO interfaces
- Worked on problem/issues raised by Production team and resolve them within specified timeline.
- Provided support for database related issues.
- Support the production team during the change activity.
- Actively participated in project discussion and implementation.
- Provided Solution within SLA of each incident tickets.
- Supported in deploy them in TIBCO Administrator with appropriate configuration using Jenkins.
- Resolve critical EMS issues.
- Enhanced existing interfaces as per business requirements using TIBCO BW with Change request.
- Production Support during deployments , and after On-live.
- Extensively monitoring alerts and doing Root Cause Analysis of Incident raised.

Technical Skills:

- TIBCO BusinessWorks
- TIBCO EMS
- TIBCO Admin
- PL/SQL

Project #4

Title: XYZ

Client: XYZ

Brief Description:

XYZ Corporation is an American multinational courier delivery services company headquartered in Memphis, Tennessee. The company is known for its overnight shipping

service, but also for pioneering a system that could track packages and provide real-time updates on package location (to help in finding lost packages), a feature that has now been implemented by most other carrier services.

Responsibilities:

- Developed Tibco Spotfire Analytics using different types of Visualizations like Scatter Plot, Bar Charts, Crosstabs.
- Worked on various Functions in creating Calculated Columns and Custom Expressions based on business requirements.
- Used Property controls, Iron Python in creating Interactive and Dynamic visualizations.
- Used On-Demand function in limiting data at Analytical Level.
- Developed Information Links by getting data from Additional Data Source (CIS).
- Worked on CIS (7.0) in creating and scheduling views.

Environment:

- Tibco Spotfire 7.6\7.01
- Ab Initio
- Teradata
- CIS
- Windows 2010
