- Previously managing 6 different projects from various IAM stream like Sun Identity Manager, SailPoint Identity IQ, Oracle Identity Manager, Dell Quest IdM.
- Proven Expertise in handling overall ownership for the IT functions like, Identity Life cycle Management, Access governance.
- An assertive manager, capable of performing a wide range of people management functions from recruiting through on-boarding, goal setting, performance appraisal, training, competency building, resource utilization & capacity planning.

Technical Skills:

Operating System   Windows (Win98, WinXP, Win2k8, Win7)
IAM   ●   Sun Identity Manager/Oracle Waveset8.1.1.
            ● SailPoint Identity IQ 6.1, 7.1px
            ●   Oracle Identity Analytics

- Oracle Access Manager (Partially)

- Caradigm – HC - Single Sign-on Product

Directory Service   ●   Microsoft Active Directory
- Sun one Directory Server
- Open LDAP

Application Server   ●   Tomcat 6.x
- WAS7.x
- JBoss 7.0.6

Database   ●   Oracle
- MySQL
- MS-SQL Server

Language   ●   Core Java

Source Control   ●   Rational Clear case

- Rational Clear Quest

- Microsoft Visual Studio

- Tortoise CVS

- Team foundation server (TFS)

Project Experience

Project#01:

Duration   :   #######

Client   :   Xyz

Synopsis: The project aimed to leverage **Oracle Identity Manager 11g R2 PS3** as the central repository and source of truth for various target systems like Oracle Siebel, Oracle Unified Directory, Retail Live (custom application). Major activities involved are below:

Team handling of 4 associates and closely working with client for Agile based project delivery.
- Created the High level and low level design for the Retail Identity Management project along with handling the team during development, SIT, UAT and production Go-Live phases.
- Client handling in daily Agile based status calls. Was front face of Tech M towards customer
- Worked in this project at client location of Melbourne, Australia and was instrumental in guiding the client business analyst for user stories creation and finalisation.
- Created different scheduled tasks for activities of initial migration: which involved partner synchronization, responsibility synchronization etc from Siebel to Oracle Identity Manager.

- Created different event handlers for different client requirements such as validation event handler for matching of email field and custom email field on the create user screen.
- Customization activities like managed beans on Add of entitlements page on Identity console so that only entitlements belonging to section of users should be available to add to cart for that user.
- Customization of console like individual employee should not be able to modify his details on identity console. Only the manager of particular organization should be able to modify the employee details.
- Performance tuning activities for the components including cache enablement, clustering of environment, JVM memory settings and jdbc data sources connection limit settings.

Project#02   :
Duration   :   ########

Client   :   Xyz

Role   :   Techincal Architect.

Team Size   :   4

Involved in various project activities
- o Requirement Analysis
- o Build
- o SIT, UAT.
- o Coordinating with Client

Tools Used: Oracle Fusion Middleware 11g R2 PS3, Web Logic App server, SQL developer for Oracle, SVN Tortoise, SSH Client, putty

Programming Languages: Java/J2EE.

Database: Oracle 11g

Project#03:

Duration   :   #########

Client   :   Xyz

Location   :   XYZ

Synopsis: The project aimed to integrate **Oracle Identity Manager, Oracle Access Manager, Oracle Adaptive Access Manager, OUD** as LDAP with TAP scheme. There were many instances of

the target web application which was protected with such an integrated environment. Many features of OAAM were utilized such as sending OTP (customized format), custom security questions, custom pin pad and forgot username, forgot password scenario. Major activities involved are below:

- Installation, configuration, Customization of the OIM, OAM, OAAM, OUD in 11g R2 PS2 version.
- LDAP sync of OIM and OUD, Integration of OIM – OAM, Integration of OAM- OAAM, Integration of OIM- OAAM. Installation and configuration of OHS and webgate instances with OAM. Configuration with F5 load balancer.
- Creating scheduled tasks and event handlers for different client requirements. Custom scheduled task to create profile in OAAM using REST services of OAAM. Custom scheduled task for resending registration emails.
- Customization of SOA composites for approval workflows. Customization was done on Beneficiary Manager Approval workflow.
- Performance tuning activities for the components including cache enablement, clustering of environment, JVM memory settings and jdbc data sources connection limit settings.
- Worked in for User migration from OIM-OAM 11g R1 components to OIM- OAM-OAAM 11g R2 PS2 components. Involved in GO live activities of 11g R2 PS2.
- Worked in this project at client location of Southampton, United Kingdom.

Project#04

Duration   :   **########**

Client   :   Xyz

Location   :   XYZ

Role   **:**   Associate Consultant
   - Involved in various project activities
      - Requirement Analysis
      - Creation of HLD, DLD
      - Build
      - Tracking and fixing Defects
      - Coordinating with Client

Tools Used: Oracle Fusion Middleware 11g R2 PS2, Web Logic App server, SQL developer for Oracle, Oracle Management Console, SVN, SSH Client, putty

Programming Languages: Java/J2EE.

Database: Oracle 11g

Project#05

Duration	:	########
Client	:	Xyz
Location	:	XYZ
Role	:	Technical Architect.

● Responsible design solution and implementation JML for US Largest Entertainment and media customer.

● Identify and provide roadmap for 190+ application onboarding strategy.

● Provide solution on Cyberark, Azure AD and AWS - AD integration and provisioning.

● Provide Roadmap for 80+ cloud application integration with IIQ7.1P1

● Patching from IIQ7.1P1 to IIQ7.1P4.

● Identify area of automation and minimize manual work.

● Integration of Ticket system (SNOW) - in-progess

Project#06

Duration	:	########
Client	:	Xyz
Location	:	XYZ
Role	:	Technical Architect.

Role & Responsibilities:
● Worked for GE Corporate, OH, US client to implement SailPoint IAM.Provide design solution and layout road maps. Few accomplishment for this business are as below
o Application On-Boarding

▪ Was responsible to On-board, Setup aggregation task against AD, LDAP, DB, Logical connector, feed file.

▪ Automate JML, provisioning, De-provisioning to the above said list of applications

o   Framework

▪   Customer had a framework, all request placed on the Self-Service portal are placed and pushed to IIQ through REST Api.

▪   There were either few defect or due to new requirement the framework code has to be aligned for which I have contributed towards the Framework support and enhancement.
o   Certification

▪   Application certification for few apps on monthly basis.
o   Others

▪   Involved in developing Custom Web-Service Connectors
▪   Few other UI customizations on Legends.

▪   Complete workflow customizations.

Project#07
Duration   :   ########

Client   :   Xyz

Location   :   XYZ

Role   :   Technical Architect.

Technical Architect
●   Worked for Xyz client to do an assessment on their current application landscape and to provide a suitable cloud based Identity and Access Management solution.

●   Okta-Cloud Identity and Access Management tool was choosen as a complete product that suites current business needs of Okta

●   Responsible for providing architecture design, integration on couple of on-premises app and cloud based apps

●   Provide high level integration specification.

●   Develop SCIM Connectorsfor On-Premises applications

Cognizant Technology Solutions, Chennai

Technology Specialist & Architect
●   Worked for a HealthCare, CA, US client to setup SailPoint IAM.Provide Architecture solution and road map till 2016. Few accomplishment for this business are as below
o Birth right access

- Setup aggregation task against feed file.

- Automate provisioning to Active Directory and exchange account.

- Assign users with role.
  o Self service

- SAR form automation

- Access express portal integration.

- Curl client integration.
  o Certification

- Plain vanilla certification for Active directory and exchange account – Annual.
  o Others

- Few other UI customizations on Legends.

- Complete workflow customizations.
