- An assertive manager, capable of performing a wide range of people management functions from recruiting through on-boarding, goal setting, performance appraisal, training, competency building, resource utilization & capacity planning.

ORGANIZATION SCAN

Project#01:

Service area : Technology Risk

Industry : Xyz

Role : Senior Consultant

Duration : Xyz

Responsibilities:

XYZ Program Management Office (PMO) manages business-driven programs, subject matter experience, and initiatives amongst several joint programs, internal and external to Department of Veterans Affairs (VA).

VA operates the nation's largest integrated health care system, with more than 1,700 hospitals, clinics, community living centers, domiciliaries, readjustment counseling centers, and other facilities. VA administers a variety of benefits and services that provide financial and other forms of assistance to Service members, Veterans, their dependents and survivors.

Several Enterprise level services have been identified to support the VA Information Technology (IT) applications. One of these "common services" includes establishing enterprise wide Identity and Access Management (IAM) Services for internal and external stakeholders. IAM services encapsulate people, processes, and technology to identify and manage the data used in an information system to authenticate users and grant or deny access rights to data and applications. The goal of IAM is to provide appropriate, authenticated access to the VA across a variety of internal and external managed end-points.

Project#02:

- Service area** : Technology Risk
- Industry** : XYZ
- Duration** : XYZ
- Role** : Configured and deployed SailPoint IdentityIQ in DEV and SQA environments in high availability

Description:

XYZ is a state supervised and locally administered social service system. Providing oversight and guidance to 120 local offices across the state, VDSS delivers a wide variety of services and benefits to over 1.6 million Virginians each year.

VDSS' programs are designed to help Virginia's most vulnerable citizens find permanent solutions to life's many challenges. The Department is responsible for administering a variety of programs, including Temporary Assistance for Needy Families (TANF), Supplemental Nutrition Assistance Program (SNAP), Medicaid, Adoption, Child Care Assistance, Refugee Resettlement Services, and Child and Adult Protective Services.

XYZ was engaged by the Virginia Department of Social Services (VDSS) for the enterprise-wide deployment of the administrative and client-side single sign-on solution using Oracle eSSO suite of products. This also includes development and testing of application integration functions for standard and custom applications. The eSSO system will leverage the Oracle Internet Directory based infrastructure to host Authentication and Central Stores. The Central Store is used to store application

specific credentials and eSSO specific configurations. Authentication store is used to store user specific credential.

Role:

- Design enterprise architecture for Simplified Sign-on solution involving eSSO, OID and OpenLdap.
- Deployment and configuration of server and client eSSO softwares
- Standing up Oracle Internet Directory structure for central user profile storage
- Integrating eSSO with OID and openLDAP for Authentication and SSO.
- Creation of application templates and password policies
- Testing, validation and use case preparation for various functional scenarios
- Creating deployment packages for pushing to end user desktops
- Maintenance and support pre and post go-live

Project#03

Service area : Technology Risk

Industry : Xyz

Duration : Xyz

Environment : Oracle eSSO 11.1.2.1.0, WebLogic 10.3, 11.1.1.7 Oracle Internet Directory and Oracle Database 11gR2.

Description:

Xyz is to develop and produce United States currency notes, trusted worldwide. As its primary function, the BEP prints billions of dollars - referred to as Federal Reserve Notes - each year for delivery to the Federal Reserve System. The Federal Reserve operates as the nation's central bank and serves to ensure that adequate amounts of currency and coin are in circulation. The BEP also advises other Federal agencies on document security matters. In addition, the BEP processes claims for the redemption of mutilated currency. The BEP's research and development efforts focus on the continued use of automation in the production process and counterfeit deterrent technologies for use in security documents, especially United States currency.

Deloitte was engaged in the implementation of an Identity Management solution to support the growth in the number of users and systems within BEP using CA Identity Management suite. The Identity Management solution will provide Web Access Management and User Provisioning.

Role:

- Configured and deployed CA Governance Minder in DEV in high availability mode
- Design and implementation of role engineering within company's environment to maximize the efficiency of current roles
- Deployed the Certification Process for User/Application/Role using CA GM

Project#04

Description:

- Xyz client to setup **SailPoint IAM**. Provide Architecture solution and road map till 2016. Few accomplishment for this business are as below
 - Birth right access
 - Setup aggregation task against feed file.
 - Automate provisioning to Active Directory and exchange account.
 - Assign users with role.
 - Self service
 - SAR form automation
 - Access express portal integration.
 - Curl client integration.
 - Certification
 - Plain vanilla certification for Active directory and exchange account – Annual.
 - Others
 - Few other UI customizations on Legends.
 - Complete workflow customizations.

Project#06:

Technical Environment	:	CA GM 12.6, Tomcat and Oracle Database.
Industry	:	Xyz
Duration	:	Xyz

Description:

Deloitte Consulting will work with MnSCU through a series of activities to effectively assist MnSCU in achieving the objectives of EAM readiness initiative, Deloitte will leverage the following customized approach based upon Deloitte's IAM methodology.

- Assess the maturity level of the different IAM components in existing environment, on a broader basis.
- Current state assessment takes into account user life cycle management, web access management, identity federation, role management and directory components
- Confirm the IAM business requirements that are currently being gathered
- Develop an IAM roadmap for replacing the legacy systems given the sunset of the Waveset product
- Conduct a SWOT (Strengths, Weaknesses, Opportunities and Threats) analysis of leading IAM product vendors that address MnSCU's business requirements
- Perform a gap analysis between current and future state IAM solution
- Provide recommendations in terms of IAM products and analysis of benefits of switching to the Oracle IAM suite procured by the State of Minnesota
- Provide options to MnSCU's executive team for a go forward IAM strategy
- Develop a template to evaluate campus readiness for EAM migration

Role:

- Involved in developing the SWOT analysis of leading different IAM products
- Performed gap analysis between existing and future state IAM solution
