**Project#04:**

**Client** : XYZ

**Duration** : XYZ

**Role** : Software Developer

**Environment** : UNIX, MySQL, Eclipse, Lisp.

**Team Size** : 6

**Project Description:**

Siteplus is a platform providing network data repository, visualization and analysis. It facilitates the process of maintaining data accurately in an ever-changing network. Siteplus lets distributed teams update data in a controlled and trackable fashion. This greatly reduces the need to manually consolidate data, avoid human errors and time wasted in getting correct data for better decision-making and planning.
